# Project Overview

T3AM To-Do is a to-do list web application that focuses on giving people a way of organizing and remembering tasks through everyday life.

## Objectives

- Grant users access to personal tasks and to-do lists through user authentication.
- Allow users to create and edit tasks on multiple to-do lists, containing aspects such as:
  - ◆ Title
  - ◆ Time
  - ◆ Date

# Use Case Scenario

Name: Destiny

Age: 21

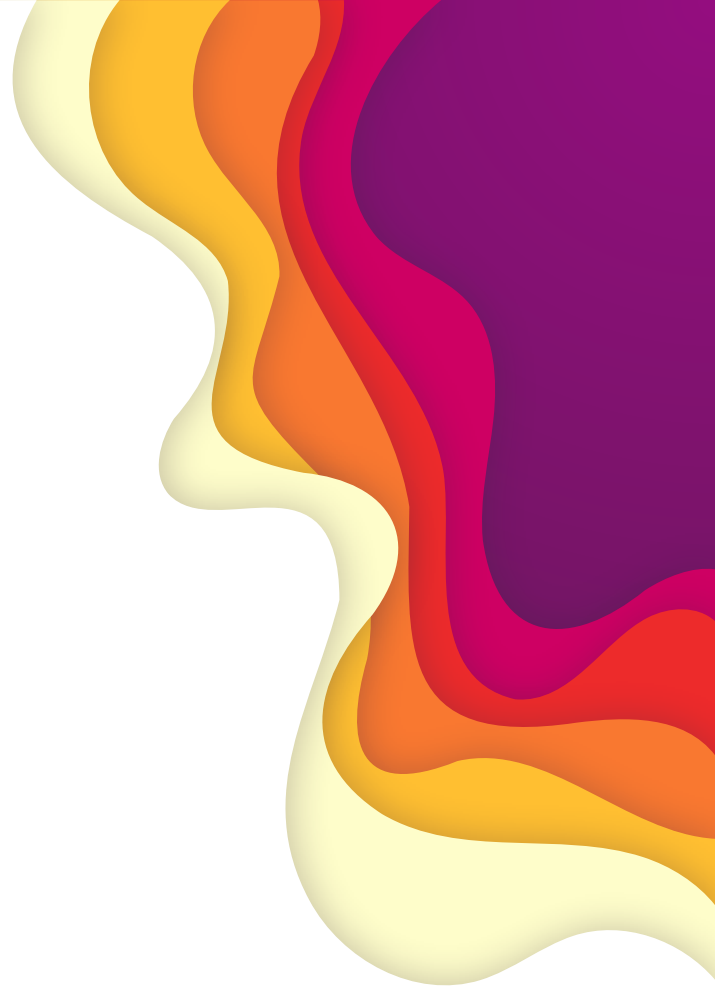

Occupation: College Student (Senior)

Being a senior in college means I have to complete my assignments, search for employment after graduation, and maintain a social balance. I want the ability to categorize my tasks and know when they are completed, so I can accomplish all of my tasks in a timely manner.

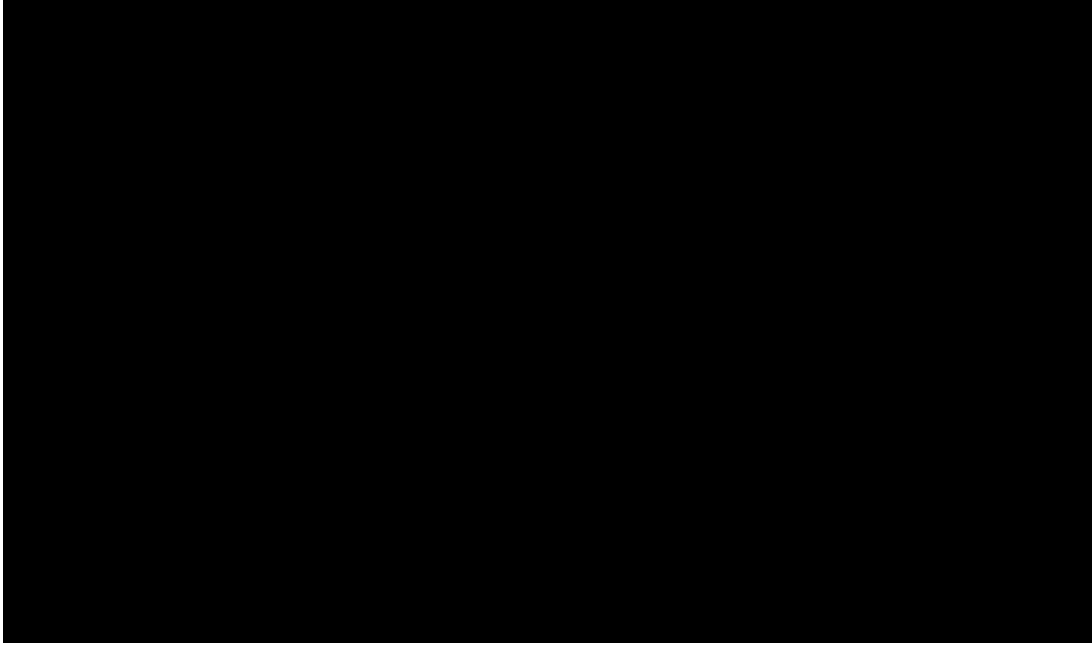

# Important Aspects of Use Case

- User Experience
  - ◆ Easy access
  - ◆ Simple navigation
    - One page
  - ◆ Professional, yet fun color scheme
- Data Collection
  - ◆ All data is stored in one location (Firebase)
